

REVOLUTIONARY BENEFITS

The new energy of Nova Scotians.

Wind projects are often located in rural areas and can become an economic hub.

We heard from local residents that the wind farm has been one of the biggest developments in their communities' history.

Consultants. All environmental, engineering, legal work was completed in Nova Scotia.

Operations and maintenance teams were resourced locally.

Our project team are all Nova Scotians. We have the talent to build these projects locally.

Transport companies and ports. We delivered into Liverpool instead of Halifax.

15%

Tax revenues to the Municipality. In Chester, the tax from South Canoe is **\$660,000** or 15% of the annual budget.

DSTN

Huge local contract for DSTN. Provided a year's worth of work to the facility and strengthened a relationship with a huge turbine supply company for future work.

Nova Scotians built all electrical assets, roads, foundations, towers. We estimate at South Canoe over **\$80 million** of work was done by Nova Scotians.

Tourism. Green technology is engaging. People want to see wind turbines.

Local Sponsorship Projects. **\$200,000**

This money helps support non-profit organizations near the wind farm and lends a hand to amazing local projects and events.

130

Truck Rentals, Restaurants, Hotels, Sign Companies, Hauling, Promotional Products, Hardware Stores, Safety Supplies, Accommodations, etc. Over 130 workers stayed in the local area during construction.

The future. We're in the schools. Discussing renewable energy. It creates a new generation of students who will look at energy differently. This will create new understanding and opportunities.

South Canoe was developed, managed, and built by Nova Scotians. It has always been our priority to use as many local skills and resources as possible on our project. Here are some of the fantastic local benefits created by the South Canoe Wind Farm.
